Casters: 5MP and 5MPB (with locking brake) feature a polyurethane tread. 5PC and 5PCB (with locking brake) casters feature a polymer horn and resist rusting. They are recommended for high-moisture environments. Large casters can create a tipping hazard. Models with 5PC casters — 68⁷/₁₆" (1739mm) high.

Note: Large casters can create a tipping hazard. On security units using 18" (457mm) deep shelving, do not use casters larger than 5" (127mm) in diameter.

Metro Tip:
Caster Selection:
 For highly corrosive environments, choose casters constructed of appropriate materials. While most wheels are corrosion resistant, the horns and axles are not. Select from a variety of Metro casters with polymer and stainless components. See pages 48-49 and 51 for more information.

Heavy-Duty Models — Stainless Steel — 62" (1575mm) high

Heavy-duty stainless steel models include staked posts for use with standard Metro dollies. Dolly bases and plate casters must be ordered separately. See pages 50-52, or consult your Metro representative for the proper caster for your application. Intermediate shelves are not included with base models and must be ordered separately.

Note: To calculate the actual height of the unit using plate casters: 62" [1575mm] + 1/4" [6mm] for dolly + load height of the caster (found on page 49).
 Dolly bases are recommended for applications where security units will be transported over the road. Please consult your Metro representative for the appropriate casters and accessories for these applications.
