

ULTIMA series **freestanding**
labware washing systems

LANCER
GETINGE GROUP

Maximum capacity. One-touch simplicity.

Professional cleaning performance.

Integrated systems, repeatable results.

Washer Function and Flexibility

From quality control to general laboratory research, Lancer ULTIMA series washers meet space and budget requirements in laboratories performing a range of critical applications where clean labware is essential. Typical applications include analytical chemistry, quality control, pharmaceutical and environmental science laboratories, wastewater treatment, food and beverage analysis, public health and consumer product testing facilities.

The exclusive Prolux programmable microprocessor controller commands a full range of prewash, wash, rinse and drying functions through simple touchscreen menus on all ULTIMA series washers. The convenience of four preset programs for light to heavy loads simplifies operation, while more complex programs can be customized whenever needed to meet specific applications.

4 Factory Preset Programs
*light, moderate, normal, heavy
and dozens more as desired*

*Lancer model 1300 LX freestanding labware washer,
shown with accessory loading rack, sold separately.*

Lancer model 1400 LXP freestanding labware washer, shown with accessory loading rack, sold separately.

Prolux programmable microprocessor controller with intuitive touchscreen user interface.

Control screen shows actual cycle performance, alarm events. Data is captured for documentation and communication.

Preset or user programmed cycles are fully adjustable to permit multiple combinations of prewash, wash, rinse, acid rinse, purified final rinse, HEPA filtered forced air drying, controlled duration, temperature and more.

High efficiency powerful fluid circulation with direct fluid path and rear manifold connections deliver optimal pressure and flow rates.

Injector jet performance provides inside out wash and rinse functions.

Stainless steel top and bottom spray arms and multiple levels of injection washing ensure thorough spray coverage.

Two integrated automatic chemical dosing pumps are standard on all models. Convenient on-board chemical storage beneath chamber saves space.

View-In-Process Window

An optional View-In-Process (VIP) window includes an interior LED light for visual verification of the interior load during the cycle.

Uncommon selection, common controls.

The Lancer ULTIMA series freestanding washers include five high-performance models that offer a range of labware loading options using baskets, injector racks or combination racks for the best high capacity processing of multiple labware types in the industry.

Quiet Operation.
Noise reduction design minimizes sound for quiet operation.

Cool Surface.
High-performance insulation contains heat and limits energy consumption.

910 LX / 1300 LX Features

Prolux Control Interface
316L Stainless Steel, Fold-down Door
Forced-air Drying, Injectors, HEPA Filtered

1400 LXP / 1600 LXP Features

Prolux Plus Control Interface
316L Stainless Steel, Fold-down Door
Forced-air Drying, Injectors, HEPA Filtered

1800 LXA Features

Prolux Plus Control Interface
High Impact Glass, Vertical Sliding Doors
Forced-air Drying, Injectors, HEPA Filtered

Capacity Comparison

Model	Volume	Interior (W x H x D)	Positions	Wash Levels	Configurations
910 LX	5.7 cu. ft. (160 L)	21.1" x 21.4" x 20.5" (535 x 544 x 520 mm)	3	2	3
1300 LX	6.4 cu. ft. (180 L)	21" x 25.4" x 20.5" (535 x 644 x 520 mm)	4	3	5
1400 LXP	10.7 cu. ft. (304 L)	24.6" x 30.4" x 24.8" (626 x 773 x 629 mm)	4	3	6
1600 LXP	14.4 cu. ft. (408 L)	27.7" x 33.8" x 26.7" (703 x 858 x 678 mm)	5	4	12
<i>w/optional height extension</i>	18.6 cu. ft. (528 L)	27.7" x 43.6" x 26.7" (703 x 1108 x 678 mm)			
1800 LXA	16.2 cu. ft. (458 L)	43.3" x 31.2" x 20.7" (1100 x 793 x 526 mm)	4 x 2	3 x 2	20*

* Three racks each side; six configurations each side.

Models shown (left to right) 910 LX, 1300 LX, 1400 LXP, 1600 LXP with optional VIP window; 1800 LXA, glass door standard.

Small spaces, **impressive capacity.**

910 LX

w/ optional condenser									365
									915
									415

■ / □ Standard / Optional Features

Repeatable results, with reliability, safety and high throughput.

Ergonomic Loading Configurations. Unlike oversized washers with less efficient loading patterns, Lancer ULTIMA series freestanding labware washers are designed for high-density loading and the most effective use of available interior space. This efficiency maximizes throughput and reduces capital investments, operating costs and the amount of dedicated lab space needed.

- Telescoping load-bearing rails permit extension of racks for easy loading with or without an optional trolley.
- All racks are interchangeable between wash levels thereby minimizing the need for additional accessories.
- Racks for Lancer ULTIMA series undercounter models and freestanding models 910 LX, 1300 LX and 1800 LXA are interchangeable.
- The fold-down door creates a platform for proper rack positioning and more comfortable loading and unloading.

Cleaning Performance and Safety. Operating systems are designed for performance, efficiency and high throughput.

- An automatic door lock prevents door opening during active cycles and protects the user from heat and chemical exposure.
- Top and bottom stainless steel spray arms are pressurized to provide exterior coverage to the labware.
- Injector rack manifold connections are located at the rear for proper alignment and the most efficient pressure and flow.
- Washing temperature can be set to a maximum of 95°C (203°F) if required for more difficult soils.
- Automatic Peristaltic pumps are self-contained for accurate and repeatable dosing of detergents or acids required by each cycle.
- Multiple DI rinses can be programmed to eliminate interior and exterior spotting.

The front-loading door folds down to create an ergonomically stable platform for proper rack positioning and easier loading, eliminating the need for a trolley to load or unload glassware. (Does not apply to model 1800 LXA with vertical sliding door.)

Alarms and Monitoring.

- The high resolution touchscreen color display is easy to read from a distance.
- The intuitive graphic user interface creates a series of visual performance indicators such as active program, time remaining, warning, alarm and cycle completed functions.
- Four preset programs permit one touch operation. Additional cycles are programmed from the graphic user interface.
- An integrated USB port allows easy front panel access for process tracking and data logging. Optional process record printouts available through USB or Ethernet ports are managed by the Prolux controller.

Hydraulic Design

The Lancer hydraulic design optimizes pressure and flow for efficient performance at all wash levels.

The combination of a high-performance recirculation pump, straight-line fluid path and center-mounted rack interface assures maximum water flow through spray arms and injectors.

Washer pump is protected from debris by a stainless steel sump screen. The screen lifts out without tools for easy cleaning.

Model 1400 LXP, waterflow

Construction. The sump, spray arms, interior chamber and door are fabricated from 316L stainless steel to resist aggressive chemicals and residues.

- Exterior 304L stainless steel panels resist corrosion, simplify cleaning and protect electrical and plumbing components.
- Double-wall insulated assembly confines heat loss and minimizes noise.
- Easy access stainless steel chamber filters extend washer life by protecting pumps and interior plumbing from debris.
- A compact liquid sump and direct fluid path minimizes water volume per fill, lowers overall consumption per cycle and improves sustainability throughout the useful life.

View-In-Process

An optional dual pane View-In-Process (VIP) window includes an interior LED light for visual verification of the interior load during the cycle. The light is activated by the On/Off switch through the Prolux controller. Tempered safety glass provides excellent sound and heat abatement and enhances operator safety. Factory installed, specify when ordering.

Model 910 LX:

13.7" (348 mm) H x 6.8" (173 mm) W

Models 1300 LX / 1400 LXP / 1600 LXP:

20" (508 mm) H x 6.8" (173 mm) W

Simple, flexible, documented, **trusted.**

Prolux Controller. The all new 3.5" Prolux and 7" Prolux Plus controllers are based on a high-performance PLC microprocessor designed for simplicity, one-touch start, real-time status indicators and intuitive programming options that permit customization over the range of washer operations.

Both the Prolux and Prolux Plus controller integrate a suite of menu screens that support digital functions from cycle selection, process monitoring, warning advisories, audible and visual alarms, system communications and data capture.

Operation.

- Screen menus and graphic user interfaces are designed to simplify setup and operations, including active programs, remaining time, warnings, alarms and cycle complete notifications.
- Four preset programs are factory loaded for one-touch control of most routine applications.
- When additional cycle programs are desired, parameters can be changed through secure access to the administration screen where an intuitive graphic user interface displays all options.

Communication and Connectivity.

- A front-panel USB port simplifies direct connection to peripheral devices for cycle tracking and data capture. The port complies with international IP21 standards for ingress protection from condensation.
- A real-time process record is printed if optional printer is installed.
- Multiple data ports include Ethernet and RS422/485 connectors.
- Optional printer documents cycle performance, warnings and alarms.

The Prolux and Prolux Plus (above) controllers include a touchscreen interface with a common icon directory that permits scrolling access to primary screens from the same menu. A set of sub-menu screens display additional icon directories specific to the screen functions.

910 LX / 1300 LX

- 3.5" Prolux color touchscreen interface
- 320 x 240 pixel resolution display
- four presets
- additional custom program options

1400 LXP / 1600 LXP / 1800 LXA

- 7" Prolux Plus color touchscreen interface
- 800 x 480 pixel resolution display
- four presets
- additional custom program options

The Prolux control interface features an intuitive menu of primary and secondary screens, configured with icons, to simplify access to all functions. The touch-screen is easily managed with a gloved hand.

Programming.

Programmable cycle parameter selections include:

- **Prewash.** Up to 3 prewashes, 0 to 30 minutes each, temperatures up to 95°C (203°F), chemical dosing as desired.
- **Wash.** 0 to 30 minutes, temperatures up to 95°C (203°F), chemical dosing as desired.
- **Acid rinse.** 0 to 30 minutes, chemical dosing, temperatures up to 95°C (203°F).
- **Running Water Rinses.** One or more short rinse sequences after the wash or rinse cycle purge the hydraulic circuit of residual detergent and rinsing agents.
- **Rinse, DI.** Up to 4 rinses, 0 to 30 minutes each. Ambient to 95°C (203°F).
- **Final Rinse, DI.** 0 to 30 minutes, temperatures up to 95°C (203°F).
- **Drying.** Up to 90 minutes, adjustable. Temperature, ambient to 110°C (230°F), Prolux Plus models; ambient to 85°C (185°F), Prolux models.
- **Cooling.** 0 to 30 minutes, adjustable.

Display Screens

Featured display screens are 3.5" screen. Displays for 7" screens are identical.

• **Program Selection.** The Program Selection screen lists the four factory presets, as well as additional presets added through administrator access.

• **Cycle in Process.** A real-time status screen displays time remaining until cycle completion and links to cycle detail screens with the touch of a button.

• **Cycle Completed.** The green Cycle Completed screen confirms completion of the cycle and indicates the washer is safe to unload.

• **Warning Message.** The amber Warning Message screen provides a status report to prompt refill of detergent and rinse agents.

• **Alarm Message.** The red Alarm Message screen confirms the reason for a system shutdown and prompts corrective action needed in advance of a restart.

Configurable for your facility.

Site Preparation and Utilities

Pre-Installation. Lancer start-up services by factory-authorized technicians include washer set and leveling, pre-installation and final inspections, soft hook-up to utilities (in place by customer), check-out and initial operation. Contact Lancer to arrange startup services. Validation documentation and execution options are available; contact Lancer for information. See options.

Post-Installation. Lancer offers technical support by direct product specialists between 8AM and 7PM Eastern Time EST.

Warranty Information. Lancer products are supported by a standard industry warranty.

Lancer Model	910 LX / 1300 LX / 1400 LXP / 1600 XLP / 1800 LX
Water Supply (hot, cold and DI)	¾" hose thread connection, recommended min. flow 5.25 gpm (20 L); lower flow rates may extend cycle times; 29-87 psi water pressure
Drain Requirement, Vertical Standpipe	1 ½" (40 mm) diameter, 20" to 27" (500 to 700 mm) above floor

Certifications

UL/IEC 61010-1

Adaptable to suit your application.

Options

Features		910 LX	1300 LX	1400 LXP	1600 LXP	1800 LXA
Discharge Water Cooling	Reduces effluent temperature to less than 60°C (140°F) for code compliant transfer to utility drain.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
pH Programming	Neutralizes effluent before transfer to utility drain.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Printer	For hard copy permanent record.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Emergency Stop	Emergency stop button.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sampling Valve	Manual sampling valve.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Count on **quality.**

Customer Service. Lancer offers a range of customer services before, during and after installation. These include technical service and support, preventive maintenance plans, and operator training and education. Contact Lancer for details.

Detergents and Rinsing Agents. For best results Lancer offers a selection of detergents and rinse agents formulated to maximize the performance of the Lancer labware washer while minimizing water consumption. Available exclusively from Lancer, these cleaning chemicals are made specifically for use in high pressure washers. To order call 407-327-8488 or contact chemsales@lancer.com.

- LancerClean Detergent is available in three solutions formulated for cleaning all different types of contaminants including laboratory soils, “baked on” organic residues, petroleum applications and other hard to clean soils. LancerClean is ideal for cleaning glassware, surgical instruments and many other labware items.

LCD-P is a potassium hydroxide based solution that provides excellent cleaning results for all types of contaminants and standard laboratory soils. It is recommended for use in all glassware washers.

LCD-S is a sodium hydroxide based solution specifically formulated to provide exceptional cleaning for the most difficult types of contaminants.

LCD-H is a low pH detergent comprised of a sodium silicate solution.

- LancerAcid Rinse is available in three formulas to meet specific cleaning requirements. Used as a rinsing agent following LancerClean detergent in the wash cycle, LancerAcid provides excellent results following washing of standard laboratory soils, organics, pharmaceutical based contaminants, petroleum and other difficult materials.

LCD-A is an acetic acid based neutralizing solution. It is the most commonly used rinsing agent.

LCD-C is an excellent rinsing agent with a citric acid based solution.

LCD-P is a phosphoric acid solution.

Lancer Undercounter Labware Washers. Lancer offers a line of compact undercounter labware washers for lower volume washing requirements. These washers are available in three models with two size options. Contact Lancer for details.

ULTIMA series labware washers
