

Getinge Lancer Ultima 815LX Laboratory Washer

Enhanced drying performance in a compact footprint

Getinge Lancer Ultima laboratory washer model 815LX is a compact undercounter washer with a superior cleaning and further enhanced optional drying system with efficient throughput for labware, to be able to dry narrow-neck glassware. The amplified performance of the drying system delivers a high throughput that safeguards your research.

The undercounter washer model 815LX offers optimal cleaning performance with high-density loading ensuring efficient use of water, detergents, and energy for sustainable performance.

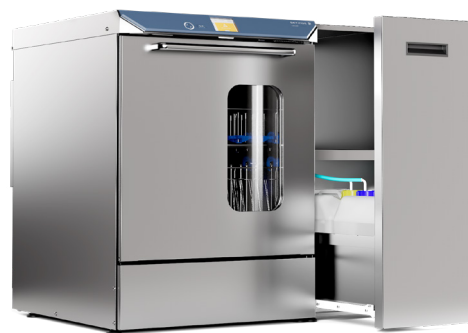

Achievements

- Optimal cleaning and drying performance
- High capacity with a compact footprint
- Reliable, safe and easy-to-use
- Sustainable performance

Benefits

- A superior capacity-to-space ratio for efficient use of space
- High-performance drying systems for the intended use, ensuring that even the most difficult load is dry at the end of the wash cycle
- Choose from a selection of two different drying systems: hot forced air chamber drying for large-mouth glassware or the optional HEPA filtered forced air injector drying for narrow-neck glassware
- One-touch simplicity through color touch screen and graphical interface with limit-less flexibility
- Balanced water circulation system that ensures optimal cleaning with low water and energy consumption
- As an accessory a side chemical cabinet is available for safe storage of chemical canisters with additional space for personal protective equipment
