

# LHP-5-URBSS-PH-NSF

#### **Product Description**

These built-in undercounter refrigerators are designed in accordance with the NSF/ANSI 456 Standard for Vaccine Storage. Units protect pharmaceuticals at optimal temperatures, preventing waste and allowing for peak delivery.

The stainless steel Refrigerators utilize microprocessor controllers and feature temperature alarms, remote alarm contacts, and probe access ports with included probes. LabRepCo Vaccine Storage Refrigerators utilize HFC-free refrigerant for environmental health and energy efficiency.

#### **General Description and Application** Description

Single Stainless Steel door Pharmacy/Vaccine Undercounter Refrigerator Built-In

Operational environment Indoor use only, +18°C to +26°C (+65°F to +78°F), <70% RH

4.6 cu. ft. gross volume Storage capacity

Door One swing door, self-closing, right hinged, non-reversible, magnetic sealed gasket, keyed lock

Three shelves (two adjustable/one fixed) with guard rail on back **Shelves** 

Mounting Low profile roller wheels and leveling legs

N/A Interior lighting

Airflow management Forced Air technology, patent pending

External probe access Rear wall port (3/4") dia. Insulation Cabinet is foamed-in-place with EPA compliant high density urethane foam

**Exterior materials** White powder coated steel

Access control Pyxis®, Omnicell® and AcuDose RX® compatible

General warranty Two (2) years parts and labor warranty, excluding display probe calibration

Compressor warranty Five (5) years compressor warranty

100 lbs. **Product Weight Shipping Weight** 140 lbs. Rated Amperage 1.74 Amps

Power Plug/Power Cord NEMA 5-15 plug, 8 to 10 ft typical, conforms to UL471 requirements, Vaccine storage power cord

warning label

**Facility Electrical Requirement** 110-120V AC: 15 A (minimum)

Certified in accordance with the NSF/ANSI 456 Standard for Vaccine Storage. UL, C-UL, ETL, C-ETL Agency Listing and Certification

listed (either single or dual agency listings) and certified to UL471 standard, hydrocarbon

refrigerant safety.

**Included Accessories** Digital Data Logger (DDL) meets current CDC requirements for vaccine storage and monitoring.

°F/°C switchable, has a 3 year certification of calibration, and buffered probe(s) in product simulated solution. Min/Max memory along with Alarm event handling. USB port for downloading

Pharmacy refrigerator/freezer toolkit and temperature logs

# **Refrigeration System**

Compressor Hermetic, high performance Refrigerant EPA SNAP compliant, R600a, Isobutane

Condenser Hybrid fin and tube with low noise fan

Evaporator Plate wall

Cycle optimized, zero energy Defrost

## **Performance**

Uniformity<sup>1</sup> (Cabinet air) +/- 0.8°C Stability<sup>2</sup> (Cabinet air) +/- 1.2°C Maximum temperature variation (Cabinet +/- 1.4°C

Temperature rise after 8 sec door

Temperature did not exceed 6.4°C at any probe for all required NSF/ANSI 456 testing protocols<sup>3</sup>

openings

Recovery after 3 min door opening All probes recover to under 8°C within 4.8 min.

1.15 KWh/day4 Energy consumption

1.57 KWh/day (224 BTU/h)4 Average heat rejection 43 or less installed Noise pressure level (dBA)

Pull down time to nominal operating temp 35 min

**Controller, Configuration, Alarms and Monitoring** Controller technology Parametric, microprocessor, LED display with 0.1°C resolution

1°C to 10°C (Setpoint must remain unaltered from the factory setting to remain compliant with Temperature setpoint range NSF/ANSI 456 Standard for Vaccine Storage requirements)

Calibrated, stainless steel Display probe

External alarm connection State switching remote alarm contacts

**Alarms** Visual and audible indicators

High / Low temperature, compliant with alarm requirements defined in the NSF/ANSI 456

Standard for Vaccine Storage

20 ml bottle, glass bead thermal media Simulator ballast

Performance data acquired at 22°C ambient, using NSF/ANSI 456 compliant validation ballast probes, empty chamber, during stabilized steady state operation and a DAQ sampling rate of one measurement every 10 seconds

- 1 Uniformity is defined as the maximum variance in temperature across all probes at any point in time over the testing period
- 2 Stability is defined as the maximum variance in temperature experienced by any single probe over the testing period
- 3 Temperature performance for all loaded and unloaded door opening protocols, all alarm, controller and probe requirements as defined in the NSF/ANSI 456 standard for vaccine storage
- 4 Data per Energy Star test results or equivalent testing and calculation. Heat rejection based on daily averages, not continuous operation. Performance exceeds Energy Star requirements.

### **Product Data Sheet**

Undercounter 4.6 cu. ft. Built-in Stainless Steel Vaccine Refrigerator - Certified to NSF/ANSI 456 Standard for Vaccine Storage

### Certifications

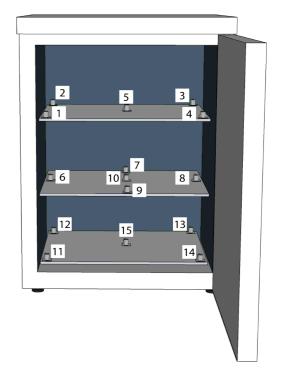

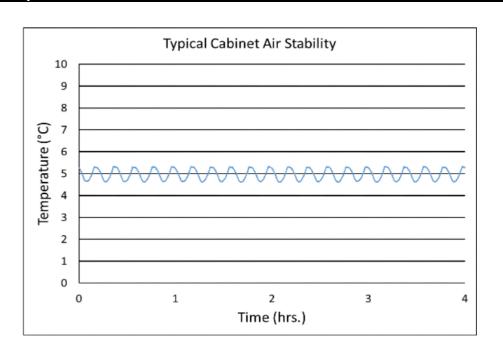

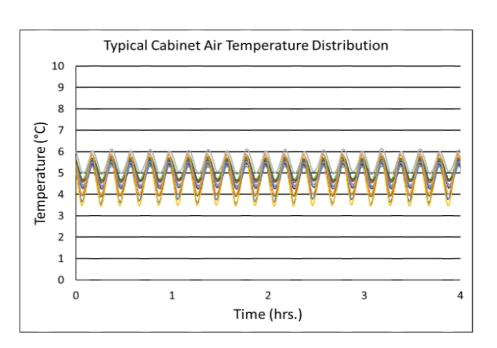

\*-one or more of these certifications may apply to this unit.

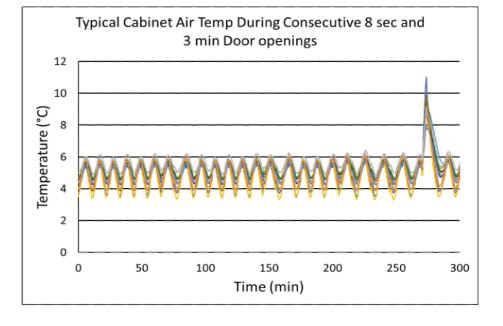

Temperature Probes								
Probe	Ave	Min	Max					
1	4.6	3.5	5.8					
2	4.9	4.3	5.4					
3	5.0	4.4	5.6					
4	4.6	3.4	5.8					
5	5.0	4.6	5.3					
6	5.3	4.7	5.9					
7	4.8	4.2	5.5					
8	5.1	4.5	5.8					
9	4.8	3.9	5.8					
10	4.8	3.9	5.8					
11	5.5	4.9	6.2					
12	5.1	4.6	5.6					
13	4.9	4.3	5.5					
14	4.9	4.0	5.9					
15	5.5	4.9	6.2
