Ultra-Low Temperature Freezers
Laboratory Refrigerators
Laboratory Freezers

For more than fifty years, the companies that preceded PHC Corporation of North America, including SANYO Biomedical and Panasonic Healthcare, have sustained a commitment to innovation and service to the life science community. Today, we continue that commitment by offering products designed for high performance and dependability marketed as the PHCbi brand.

All products in the ENERGY STAR collection are independently tested for temperature control, uniformity, door open recovery, HVAC impact and energy use in real-world conditions.

ABOUT ENERGY STAR

ENERGY STAR is the simple choice for energy efficiency. For nearly 25 years, people across America have looked to EPA's ENERGY STAR program for guidance on saving energy, saving money, and protecting the environment.

Behind each blue label is a product, building, or home that is independently certified to use less energy and cause fewer of the emissions that contribute to climate change. Join the millions already making a difference at energystar.gov.

GLOBAL INITIATIVES

Our commitment to the ENERGY STAR evaluation processes underscores a value added service to the global scientific and laboratory research community.

- Maintains the highest level of collaboration in support of ENERGY STAR
- Assures new high performance refrigerators, freezers and ultra-low temperature freezers are designed to meet ENERGY STAR criteria

INDEPENDENT TESTING AND PROTOCOL

We use independent testing facilities licensed and certified for testing to the ENERGY STAR criteria to validate our laboratory equipment.

ENERGY STAR protocols, widely used in consumer product evaluations, are now being extended to the scientific community where product comparisons have rarely been independently tested for comparative evaluation. As a result, our customers now benefit from verifiable refrigerated product performance metrics.

The image displays a variety of PHCbi laboratory equipment, each with an associated ENERGY STAR energy efficiency label. The labels are as follows:
