ANESTHESIA EQUIPMENT AND SUPPORT TO ADVANCE HEALTH RESEARCH

Patterson Scientific manufactures and supports a comprehensive range of anesthesia products created for researchers. We craft products for ease of use, durability and availability. We support researchers with expert guidance and act as an advocate for advancing life-saving research.

We promise support from original purchase to everyday use. From helping you select the right equipment to walking you through setup, our highly knowledgeable team offers end-to-end support.

Built by Patterson Scientific, our products have gained a reputation for durability and performance. They're in stock and ship quickly, too, ready to reliably help you move your research forward.

Lab Animal Anesthesia Bench – Elite

AN ALL-INCLUSIVE MOBILE WORK SYSTEM

Take your lab anywhere with the Lab Animal Anesthesia Bench (LAAB) – Elite. The Link 7 is teamed up with a portable oxygen source, a magnetic workspace and a shelf for anesthesia accessory storage. Whether your anesthesia system is used by multiple departments or simply needs to be moved from room to room, this system will meet your needs.

Link 7 Anesthesia and Evacuation System

SIMPLE AND EFFECTIVE INHALANT ANESTHESIA AND EVACUATION SYSTEM

This all-inclusive system combines our powerful gas delivery system (SAS-3) with our waste gas evacuation system (EVAC 4) and streamlines your laboratory procedures. Get higher patient throughput with lower rates of mortality with this intuitive system.

SAS-3 Smart Anesthesia System

INTUITIVE DESIGN FOR MAXIMUM EFFICIENCY

The SAS-3 has three anesthesia stations with color-coded tubing and connectors so investigators can easily identify which fresh gas supply goes to each station, increasing efficiency and minimizing subject mortality. With no flowmeters to adjust, investigators can spend more time focused on the procedure.

Compact Convertible Anesthesia System

HIGH-QUALITY, PORTABLE ANESTHESIA DEVICE

Our Compact Convertible Anesthesia System is the most popular lab animal anesthesia device for research institutions. The unique design allows the Compact Convertible to be used as a self-contained anesthesia system or as a portable anesthesia system (PAM). Can be used on a tabletop, in a fume hood or other space challenged work areas when removed.

Versa II Anesthesia System

VERSATILE SMALL ANIMAL ANESTHESIA DELIVERY SYSTEM

The Versa II is a versatile small animal anesthesia delivery system. It can be pole mounted, wall mounted or made into a tabletop. Please note: Versa II does NOT come with a vaporizer. Features and specifications:

- Portable and convertible to tabletop
- Rebreathing/Non-rebreathing switch
- Supports up to 2 vaporizers
- Integrated occlusion valve
- Absorber capacity of 1200 ml
- Absorber gasket made of silicone for enhanced sealing
- Constructed of durable, chemical-resistant materials
- 54" H x 27" W x 27" D
- Lifetime product warranty

Included with each machine:

- Circuit F-Style 40" with 2 Liter Bag – 78911827
- Circuit MJR-Style with 1/2 Liter Bag – 78911828
- Scavenger Tubing 19 mm ID (6 Ft Included) – 78914311
- Adapter 19 mm OD X 22 mm ID Plastic – 78914880
- Clean Air Canister Holder - Versa II – 78919386
- Clean Air Canister PVS – 78655891

Compact Anesthesia System

ALL THE NECESSARY FEATURES IN A SMALLER FOOTPRINT DESIGNED TO SUPPORT ONE VAPORIZER

The Compact Anesthesia System is a basic veterinary anesthesia system with all the necessary features in a smaller footprint designed to support one vaporizer. It is equipped with both rebreathing/non-rebreathing functions and a fresh gas outlet.

- Simple universal design that is available in three different configurations: mobile, wall-mount or tabletop
- Condensed frame/smaller footprint
- Wall-mount version is easily mounted flush to the wall
- Pop-off occlusion valve included for safety
- Lifetime warranty

Tec 3EX Vaporizer

HIGH QUALITY VAPORIZER

Patterson Scientific offers new precision flow-rate and temperature compensated vaporizers to complement our anesthesia systems. The new Tec 3EX is an extended capacity (250 cc) vaporizer that has a 10-year warranty contingent upon a 2-year service cycle. Larger capacity for liquid anesthetic means filling the vaporizer less often, which in turn reduces exposure to anesthetic gases. Both isoflurane vaporizers and sevoflurane vaporizers with either funnel fill or pin index/key fill systems are available.

Vapor-Vac Hooded Induction Chamber

INDUCTION CHAMBER DESIGNED TO REDUCE EXPOSURE TO WASTE ANESTHETIC GAS

Our slide-top Vapor-Vac Hooded Induction Chamber is designed to greatly reduce waste anesthetic gases from the workplace and can easily be used with active vacuum waste gas management systems. Constructed from PVC, our induction chambers are shatter resistant and don't break down due to exposure to isopropyl alcohol.

Vapor-Vac Hooded Induction Chamber

Posi-Vac Non-Rebreathing System

THE LEADER IN ANESTHESIA EQUIPMENT AND SUPPLIES

The Posi-Vac Non-Rebreathing System is used with an in-house vacuum or Patterson Scientific's EVAC 2 or 4 to greatly reduce waste anesthetic gases. Each system includes a Mapleson-D style body, lab animal anesthesia nosecone with incisor bar and waste anesthetic gas collecting shroud. Available in three sizes.

Uniflow Single Manifold

MANIFOLD DESIGNED TO REDUCE EXPOSURE TO WASTE ANESTHETIC GAS

Our Uniflow manifolds are designed to greatly reduce waste anesthetic gases from the workplace and can easily accommodate one mouse or small rat. No nosecone or latex materials are required for use, and because the Uniflow is embedded with magnets, it can be effortlessly positioned.

The Uniflow effectively delivers fresh gas to the subject and removes the waste gases when used in conjunction with an attenuated in-house vacuum source, or Patterson Scientific's EVAC 2 or EVAC 4 vacuum system.

EquaFlow Manifold

MANIFOLDS DESIGNED TO REDUCE EXPOSURE TO WASTE ANESTHETIC GAS AND DELIVER EQUAL AMOUNTS OF ANESTHETIC

Our EquaFlow manifolds are designed to prevent unwanted animal awakenings, scavenge 99.99% of waste gas and enhance animal ergonomics. Available in several sizes, these manifolds can be used in the prep area outside an optical imaging station, in our 3- or 5-mouse sealed imaging chambers for Bruker or Perkin Elmer, or inside an imaging system as a stand-alone manifold. The EquaFlow manifolds require attenuated in-house vacuum or Patterson's EVAC 2/4 to operate.

RAT STEREOTAXIC NOSECONE

Patterson Scientific's Rat-Taxic is the only stereotaxic nosecone with incorporated waste gas management. The Rat-Taxic effectively delivers fresh gas to the subject and removes the waste gases when used in conjunction with an attenuated in-house vacuum source, or Patterson Scientific's EVAC 4 vacuum system. The Rat-Taxic is specifically for use with rat subjects and will fit any rat size stereotaxic frame. The Rat-Taxic is made of anodized aluminum and can be cleaned in an autoclave (with plastic tubing/adaptor removed) or with any disinfectants.

Universal Rodent Nosecone NRB System

REDUCES THE AMOUNT OF ANESTHETIC GAS LEAKS

Includes a Mapleson-D type body and nosecone for use with rodents up to 275 grams. For larger rodents, a special nosecone can be purchased. The Universal Rodent Nosecone Mapleson-D body is smaller than the typical Mapleson-D type body, which reduces dead space even further and makes it ideal for very small rodents. The Universal Rodent Nosecone comes with a latex diaphragm which seals around the nose of the rodent and reduces the amount of anesthetic gases that may leak into the room. The diaphragm also helps hold the nosecone in place during manipulation of the animal. Extra latex diaphragm material is included.

Universal Rodent Nosecone NRB System

78909584

Universal Rodent Nosecone
NRB System

Rodent Face Masks

REDUCES THE AMOUNT OF ANESTHETIC GASES THAT MAY LEAK INTO THE ROOM

Rodent face masks are made from clear polycarbonate and fit all non-rebreathing anesthesia systems. This anesthesia delivery system is designed for use with the Mapleson-D style non-rebreathing system 78909636. The diaphragms on these masks seal the mask around the face of the rodent and reduce the amount of anesthetic gases that may leak into the room. Face mask diaphragms are made from 12 mil thick latex and openings can be cut in the diaphragm to accommodate rodents of different sizes. Comes with extra diaphragm material and O-ring.

Face Mask (Product Warranty 90 Days):

- Universal Rodent: .75" diameter x 1" deep – 78914727
- Small: 1" diameter x .75" deep – 78909681
- Medium: 1.5" diameter x 1.125" deep 150 to 200 grams – 78909682
- Large: 1.75" diameter x 1.5" deep 200 to 350 grams – 78909683
- X-tra Large: 2" diameter x 1.75" deep – 78909684

Replacement NRB Diaphragm Material (Product Warranty Out of Box Only):

- Medium – 78914972
- Large – 78914973
- X-tra Large – 78914974

Rodent Face Masks

Mapleson-D Non-Rebreathing System

DESIGNED FOR MINIMUM MECHANICAL DEAD SPACE

Designed for minimum mechanical dead space when used with research anesthesia nosecones or face masks, the Mapleson-D non-rebreathing system is suitable for use with rodents, rabbits, guinea pigs and other small animals. Please note this unit requires a face mask for proper use.

- Product warranty 6 months

Diverter Manifolds

ECONOMICAL WAY FOR THE USER TO CONTROL THE FLOW OF ANESTHETIC

The Diverter Manifolds are an economical way for the user to control the flow of anesthetic between multiple devices (i.e., induction chamber and non-rebreathing systems) while using only one inhalant anesthesia system. Stopcocks provide positive verification that the valve is open or closed.

Dual Diverter Manifold

78914724

Tri Diverter Manifold

Tri Diverter Manifold

Dual Diverter Valve System

ECONOMICAL WAY FOR THE USER TO CONTROL THE FLOW OF ANESTHETIC

The Dual Diverter Valve System is an economical way for the user to control the flow of anesthetic between two devices (i.e., induction chamber and non-rebreathing system) while using only one inhalant research anesthesia system. Stopcocks provide positive verification that the valve is open or closed.

- Product warranty 1 year

Dual Diverter Valve System

78914723

Dual Diverter Valve System

Multiplex Delivery System (MDS)

PROVIDES MAXIMUM SAFETY FOR THE ANIMAL SUBJECTS

The MDS allows the investigator to use up to three stations simultaneously using only one anesthesia vaporizer and ensures proper fresh gas flow rate to each station used. This provides maximum safety for the animal subjects. The MDS is available in 2,3 and 4 flowmeter configurations and includes a pressure relief valve. The pressure relief valve will vent pure O₂ (not anesthetic gas) into the environment in the event that the O₂ flowmeter on the anesthesia machine is turned on without any individual flowmeters being turned on – preventing vaporizer damage. This pressure relief valve can easily be installed on any research anesthesia system. Color-coded tubing and common outlets are included.

- Product warranty 2 years

The MDS can be installed on the Portable Anesthesia Machine (PAM) without any additional mounting brackets and can be installed on any other research anesthesia system using the Universal Mounting Block – 78914734

Bain Style Non-Rebreathing Circuit Block

DESIGNED TO BE USED WITH A NON-REBREATHING RESEARCH ANESTHESIA CIRCUIT

The Bain Style Non-Rebreathing Circuit Block is designed to be used with a non-rebreathing research anesthesia circuit. The built-in manometer measures cm of water pressure, allowing the operator to monitor proper inflation of the lungs when manually ventilating a patient. The pop-off valve assists in controlling manual or mechanical ventilation as well as waste gas removal.

- Product warranty 2 years
- 60" Bain Style Non-Rebreathing Circuit (COAXIAL) included 78918187 (Product warranty out of box only)

Humidifier for Long-Term Rodent Anesthesia

ALLOWS INVESTIGATORS TO CONDUCT LONGER DURATION STUDIES

This humidifier allows investigators to conduct longer duration studies using research anesthesia equipment without the risk of dehydration of the subject's nasal mucosa and lungs. Sterile water is placed in the humidifier, which is connected in line with the anesthetic gas source. Humidification occurs at all commonly used flow rates. It is recommended that the water in the humidifier be changed after every use or every six hours. Supplied with three extra nebulizers 78909453.

- Product warranty 1 year

ProStation Heated Workstation

COMPACT, HEATED WORKSTATION

The *ProStation*™ Heated Workstation is heated with warm water and includes a down-draft anesthetic gas evacuation vent with the option to be used with an active waste gas evacuation system. The *ProStation* works with non-rebreathing systems and requires no special adapters or hardware. Made of thermally productive materials, the *ProStation* does not draw body heat from your subjects and can be easily cleaned in a commercial cage washing system or autoclave.

EVAC 2 and EVAC 4 Systems

SIMPLE AND EFFECTIVE WASTE GAS EVACUATION AND VACUUM ATTENUATION SYSTEM

Our research anesthesia evacuation system features a user-friendly, compact design and generates a 45 LPM negative flow that can be attenuated with easily accessible toggle switches. The flow can be divided between up to three anesthesia stations, not including an induction chamber. Waste anesthetic gases can be discharged into activated charcoal canisters or a non-recirculating hood, reducing your exposure to waste gas.

EVAC 2 07-8918181

EVAC 2 INTERNATIONAL 07-8926557

EVAC 4 07-8908646

SCOOP Stereotaxic Waste Gas Management

FOR USE DURING MOUSE STEREOTAXIC PROCEDURES USING IN-HOUSE, ACTIVE WASTE GAS MANAGEMENT

Stereotaxic nosecones for use with inhalant anesthesia have a notch underneath through which waste anesthetic gases can pass into the environment. Through testing, we have discovered that a large component of the waste gases simply drop down through this notch. As a result, we used our expertise in lab animal anesthesia equipment to design the "SCOOP."

How Patterson Scientific's "SCOOP" resolves this issue:

- In-house, active vacuum must be attenuated to 15 LPM negative flow.
- When positioned directly beneath a mouse stereotaxic nosecone, the SCOOP effectively removes waste anesthetic gases known to escape through the open notch in the bottom of the stereotaxic nosecone.
- Connects to the mouse stereotaxic nosecone waste gas outlet to effectively remove waste anesthetic gases directly from the nosecone.
- The SCOOP has been tested at three prestigious institutions with all testing results passing OSHA's rigorous standards.
- One-year product warranty.

SCOOP

WAG Canister (Waste Anesthetic Gas)

CONTAINS THE HIGHEST QUALITY ACTIVATED CHARCOAL AVAILABLE

Contains 2 pounds of the highest quality activated charcoal available to make the WAG Canister the most effective filter on the market. Will adsorb 200 grams of halogenated agent (4 times the amount of traditional activated charcoal canisters). Unique design traps isoflurane or sevoflurane molecule in canister. Relief holes on top ensure that canister can sit upright on a flat surface. Passed independent testing according to OSHA regulations of 2 ppm (using infrared spectrophotometer). No breakthrough exhibited at +/-60 LPM flow rate.

Cable Oximeter Patterson PS900

SIMPLE AND EFFECTIVE PULSE OXIMETRY MONITORING FOR RODENTS AND OTHER SMALL ANIMALS

The Patterson PS900 Cable Oximeter is a compact and portable system consisting of a USB-ready cable oximeter that plugs into your Windows-based laptop or tablet, easy-to-download software, an oximetry extension cable, and the sensor(s) you need to obtain accurate readings for rodents, cats, and small dogs. The cable oximeter technology and sensors are veterinary specific and can capture pulse rates up to 900 beats per minute! Most veterinary-specific technology on the market can only reach pulse rates up to 350 beats per minute. In addition to providing the pulse rate, the Patterson PS900 Cable Oximeter also provides the SpO₂%, pulsatile waveform, and perfusion %, as well as trend data that can be exported into an Excel spreadsheet.

PS900 Cable Oximeter - Rat (or other pocket pets)

Includes: PS900 Cable Oximeter, Extension Cable, Rat Oximetry Sensor Paw, and Rat Oximetry Sensor Tail
78938072

PS900 Cable Oximeter - Mouse (or other pocket pets)

Includes: PS900 Cable Oximeter, Extension Cable, Mouse Oximetry Sensor Paw, and Mouse Oximetry Sensor Tail
78938073

PS900 Cable Oximeter - Veterinary (for use with rabbits, cats, dogs) Includes: PS900 Cable Oximeter, Oximetry Y Sensor with clip, and Sensor Oximetry Reflective
78938074

ANTI-SPILL DEVICES

<input type="checkbox"/>	78040735	Isoflurane anti-spill device (9010-f)
<input type="checkbox"/>	78040750	Isoflurane pin index fill device (8907-f)
<input type="checkbox"/>	78040768	Sevoflurane anti-spill device
<input type="checkbox"/>	78910597	Sevoflurane pin index fill device (8907-s)

DIVERTER SYSTEMS

<input type="checkbox"/>	78914723	Dual diverter valve system
<input type="checkbox"/>	78914724	Dual diverter manifold with 2 stopcocks with color-coded stopcocks, tubing, and end fittings
<input type="checkbox"/>	78914725	Tri diverter manifold with 3 stopcocks (as-01-0529-30)
<input type="checkbox"/>	78914732	Multiplex delivery system - 2 station with pressure relief valve
<input type="checkbox"/>	78914733	Multiplex delivery system - 3 station with pressure relief valve
<input type="checkbox"/>	78918185	Multiplex delivery system - 4 station with pressure relief valve

FACE MASKS

<input type="checkbox"/>	78909681	Small rodent face mask (1" dia x .75" L) with 6 x 12 sheet latex and O-rings
<input type="checkbox"/>	78909682	Medium rodent face mask (1.5" dia x 1.125 deep) with 6 x 12 sheet latex and O-rings
<input type="checkbox"/>	78909683	Large rodent face mask (1.75" dia. x 1.5" deep) with 6 x 12 sheet latex and O-rings
<input type="checkbox"/>	78909684	X-large rodent face mask (2" dia. x 1.75" deep) with 6 x 12 sheet latex and O-rings
<input type="checkbox"/>	78914727	Universal rodent nosecone

FLOWMETERS

<input type="checkbox"/>	78914315	Porter mechanical stop O2 flow control only
<input type="checkbox"/>	78106584	Flowmeter O2-resp 0-15 lpm
<input type="checkbox"/>	78909429	Flowmeter cover for Porter (0-1 lpm flowmeter, 0-4 lpm flowmeter, 0-12 lpm) flowmeters

HOSES

<input type="checkbox"/>	78927007	Hose assembly 10 ft air supply with DISS female each end
<input type="checkbox"/>	78927008	Hose assembly 10 ft O2 supply with DISS female each end
<input type="checkbox"/>	78907560	Hose retractor

IMAGING CHAMBERS

<input type="checkbox"/>	78919406	Imaging chamber for use in Bruker imaging systems
<input type="checkbox"/>	78919969	Imaging chamber - a 5-mouse imaging/isolation chamber with 5-mouse EquaFlow manifold (as-01-0458)
<input type="checkbox"/>	78920341	Imaging chamber - a 3-mouse imaging/isolation chamber with 3-mouse EquaFlow manifold nfv
<input type="checkbox"/>	78921684	Imaging chamber tube retainer for Xtreme II
<input type="checkbox"/>	78921685	IMAGING CHAMBER KIT FOR XTREME I
<input type="checkbox"/>	78921686	Imaging chamber tube kit for Xtreme II
<input type="checkbox"/>	78921855	Small HEPA filter
<input type="checkbox"/>	78919983	UltraTech optical cleaner for imaging chamber windows
<input type="checkbox"/>	78919971	Clear 1.5 m 310 x 380 Clarex sheet for optical imaging system
<input type="checkbox"/>	78919982	One package of 100 Crew 2 lint-free wipes
<input type="checkbox"/>	78919260	Disposable HEPA filters

INDUCTION CHAMBERS

<input type="checkbox"/>	78933385	Hooded induction chamber PVC 12" x 6" x 8"
<input type="checkbox"/>	78933387	Sliding top induction chamber PVC 12" x 6" x 6"
<input type="checkbox"/>	78933388	Sliding top induction chamber PVC 9" x 5" x 5"
<input type="checkbox"/>	78933389	Sliding top induction chamber PVC 5" x 5" x 5"
<input type="checkbox"/>	78940014	Sliding top induction chamber PVC 5" x 2.5" x 2.5"

MONITORS (EXCEPT FOR CANADA)

<input type="checkbox"/>	78929128	SpO2 pulse ox monitor handheld + battery
<input type="checkbox"/>	78929129	SpO2 pulse ox monitor handheld + ECG/battery
<input type="checkbox"/>	78936309	AccuWave Pro M9000vet w/Accuvet and SunTech
<input type="checkbox"/>	78936308	AccuWave Plus M8500vet w/Accuvet and SunTech
<input type="checkbox"/>	78912512	Stand rolling
<input type="checkbox"/>	78938073	PS900 cable oximeter - mouse
<input type="checkbox"/>	78938072	PS900 cable oximeter - rat
<input type="checkbox"/>	78938074	PS900 cable oximeter - veterinary
<input type="checkbox"/>	78937434	Extension cable for mouse/rat sensors
<input type="checkbox"/>	78937435	Mouse oximetry sensor paw
<input type="checkbox"/>	78937436	Mouse oximetry sensor tail
<input type="checkbox"/>	78937437	Rat oximetry sensor paw
<input type="checkbox"/>	78937438	Rat oximetry sensor tail

O2 ACCESSORIES

<input type="checkbox"/>	78912526	Dual O2 E-cylinder manifold
<input type="checkbox"/>	78932452	O2-N2O E-cylinder manifold
<input type="checkbox"/>	78932453	O2-CO2 E-cylinder manifold
<input type="checkbox"/>	78932451	O2-air E-cylinder manifold
<input type="checkbox"/>	78914319	O2 E-tank wrench
<input type="checkbox"/>	78909626	O2 E-tank cart/single
<input type="checkbox"/>	78922680	AirSep Intensity 10 oxygen concentrator
<input type="checkbox"/>	78920467	Air supply kit includes H-tank reg, 10 ft supply hose and NPT x DISS fitting
<input type="checkbox"/>	78124848	Dual gas supply for both E-tank and/or H-tank or piped-in O2
<input type="checkbox"/>	78910883	Oxygen flush valve kit for PAM
<input type="checkbox"/>	78919041	Power take-off with demand valve
<input type="checkbox"/>	78920466	O2 supply kit includes H-tank reg, 10 ft supply hose and NPT x DISS fitting

NON-REBREATHING SYSTEMS

<input type="checkbox"/>	78909584	Universal rodent nosecone NRB system
