LABRepCo

LHE-12-SD-PHNSF

Product Description

These cutting-edge pharmacy refrigerators are certified in accordance with the NSF/ANSI 456 Standard for Vaccine Storage. With this certification, units protect pharmaceuticals at optimal temperatures, preventing waste and allowing for peak delivery. Our premium line includes features such as extensive alarm systems and digital touch pad displays.

These solid door refrigerators utilize microprocessor controllers and feature temperature alarms, remote alarm contacts, and probe access ports with included probes. Units run on natural, hydrocarbon refrigerant for environmental health and energy efficiency.

General Description and Application			
Description	Single Solid Door Pharmacy/Vaccine Upright Refrigerator		
Operational environment	Indoor use only, +18°C to +26°C (+65°F to +78°F), <70% RH		
Storage capacity	12 cu. ft. gross volume		
Door	One swing solid door, self-closing, right hinged, non-reversible, magnetic sealed gasket, keyed lock		
Shelves	Six shelves (five adjustable/one fixed) with guard rail on back		
Mounting	3 1/2" Swivel Casters(two locking)		
Interior lighting	Shielded, switched LED lighting, full coverage, balanced spectrum		
Airflow management	Forced Air technology, patent pending		
External probe access	Rear wall port (3/4") dia.		
Insulation	Cabinet is foamed-in-place with EPA compliant high density urethane foam		
Exterior materials	White powder coated steel		
Access control	Pyxis®, Omnicell® and AcuDose RX® compatible		
General warranty	Two (2) years parts and labor warranty, excluding display probe calibration		
Compressor warranty	Five (5) years compressor warranty		
Product Weight	231		
Shipping Weight	256		
Rated Amperage	3		
Power Plug/Power Cord	NEMA 5-15 plug, 8 to 10 ft typical, conforms to UL471 requirements, Vaccine Storage power cord warning label		
Facility Electrical Requirement	110-120V AC: 15 A (minimum)		
Agency Listing and Certification	Certified with the temperature performance requirements as defined in the NSF/ANSI 456 Standard for Vaccine Storage for all testing scenarios. UL, C-UL, ETL, C-ETL listed and certified to UL471 standard, hydrocarbon refrigerant safety.		
Included Accessories Digital Data Logger (DDL) complies with the current CDC guidelines, with 3 years ce calibration, "buffered" probe in the product simulated solution, min/max memory, installable, and visual & audible temp alarm			

Refrigeration System

Compres

Refrigerant

Condenser

Evaporator Defrost Hermetic, high performance EPA SNAP compliant, R290, propane Fin and tube design, high efficiency fan Fin and tube design, high efficiency fan Cycle optimized, zero energy

Performance Uniformity¹ (Cabinet air) +/- 0.7°C Stability² (Cabinet air) +/- 1.3°C Maximum temperature variation (Cabinet air) +/-1.1°C Temperature rise after 8 sec door openings Temperature did not exceed 5.4°C at any probe for all required NSF/ANSI 456 testing protocols³ Recovery after 3 min door opening All probes recover to under 8°C within 2.5 min 0.61 KWh/day⁴ Energy consumption Average heat rejection 1.20 KWh/day (315 BTU/h)4 Noise pressure level (dBA) 48 or less installed Pull down time to 4°C nominal operating temp 30 min

Pharmacy refrigerator/freezer toolkit and temperature logs

Controller, Configuration, Alarms and N oring Controller technology Parametric, microprocessor, LED display with 0.1°C resolutio Display technology NSF/ANSI 456 Standard for Vaccine Storage compliant digital temperature display and alarm module with battery back-up. Temperature setpoint range 1°C to 10°C (Controller settings must remain unaltered to ensure thermal performance compliant with NSF/ANSI 456 Standard for Vaccine Storage requirements) Calibrated, stainless steel Display probe External alarm connection State switching remote alarm contacts Visual and audible indicators Alarms High / Low temperature, compliant with alarm requirements defined in the NSF/ANSI 456 Standard for Vaccine Storage Simulator ballast Glass bead thermal media

Performance data acquired at 22°C ambient, using NSF/ANSI 456 compliant validation ballast probes, empty chamber, during stabilized steady state operation and a DAQ sampling rate of one measurement every 10 seconds

1 - Uniformity is defined as the maximum variance in temperature across all probes at any point in time over the testing period

2 - Stability is defined as the maximum variance in temperature experienced by any single probe over the testing period

3 - Temperature performance for all loaded and unloaded door opening protocols, all alarm, controller and probe requirements as defined in the NSF/ANSI 456 standard for vaccine storage

4 - Data per Energy Star test results or equivalent testing and calculation. Heat rejection based on daily averages, not continuous operation. Performance exceeds Energy Star requirements.

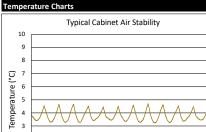

Product Data Sheet

Upright 12 cu. ft. Solid Door Refrigerator, High Performance -Certified to NSF/ANSI 456 Standard for Vaccine Storage

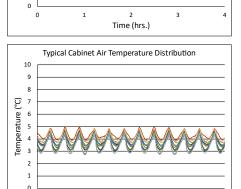

*-one or more of these certifications may apply to this unit.

Cemperature Probes					
Probe	Ave	Min	Max		
1	3.5	2.7	4.7		
2	3.8	3.4	4.5		
3	4.0	3.7	4.5		
4	3.7	3.1	4.7		
5	3.8	3.4	4.5		
6	3.9	3.4	4.7		
7	3.8	3.4	4.6
